

Why Hire A NFI Certified Hearth Professional?

- ☑ Trained on selecting & installing the various fuels, types & brands of fire appliances for your home.
- ☑ Trained on appropriate size, type, configuration, & height of venting system.
- ☑ Trained on using the proper materials for heat protection of walls & floors.
- ☑ Trained on guidelines for operation & maintenance of the hearth system in compliance with code regulations as well as the manufacture's instructions.

Did You Know?

A Fireplace is an Appliance?

Just like your HVAC, range, washer/dryer and your water heater, a "hearth" appliance which includes a fireplace, stove and/or insert needs to be serviced annually for efficiency and safety.

A Fire Feature Adds Value to Your Home

According to The National Association of Realtors, adding a fireplace can raise your home value by as much as \$12,000!

There are Many Options to Choose From?

When starting your new fire feature project, a certified hearth design specialist may ask you:

- Is this a new, additional or replacement fire appliance?
- Is the fire feature for heating or aesthetic purposes?
- Are you interested in gas/propane, wood, pellet or electric?
- Do you want to add a stone or speciality surround?
- What is your budget and timeline?

Trust Experience. Hire Local.

Many local hearth retailers have employed and certified their team year after year. Look for the NFI Certified logo, ask your local hearth retailer, or visit our website to search for a NFI Certified Pro near you!
